

BROCHURE - Focus areas:

Data Management:

- Big Data
- No SQL, Hadoop, Low Code No code etc
- Machine Learning using tools like R and Azure ML
- Predictive Analytics
- BI and DW using multiple stacks and tools

Cloud Solutions and Services (Solutions and Processes)

- Next Generation IT services
- Enterprise Class hosted Servers
- Desktop-as-a-Service
- DB-as-a-Services
- Virtual Private Cloud
- Secure, high speed, expandable storage environment
- Instantaneous deployment and support for popular devices
- Low entry cost with Pay as you go pricing
- US based datacenter for primary hosting and replication
- Cloud Adoption and Implementation
- Infrastructure Optimization

Services addressing Typical Challenges

- Systems Integration
- Data, AI/ML
- Covid Solution for Safe “Back to Work” strategy, safe Employee and Environment
- Cloud
- Automation
- Enterprise Architecture
- Applications Development and Modernization
- IoT
- Microsoft Licensing
- Staff Augmentation

Innovation

- IoT to: Add value to products, engage consumers in new & exciting ways, gather data on environmental conditions, create enhanced SLA's, develop new business models
- NLP: Natural Language Processing
- AI and Augmented Reality
